

<i>Hawkins, F. M.</i> , Veiled absorption lines	285
<i>Hazard, C., R. Hanbury Brown and</i> , The radio emission from normal galaxies, II	479
<i>Hewish, A., P. F. Scott, M. Ryle and</i> , First results of radio star observations using the method of aperture synthesis	95
<i>Holmes, J.</i> , A study of sunspot velocity fields using a magnetically undisturbed line	301
<i>Hoyle, F., J. Crampin and</i> , On the change with time of the integrated colour and luminosity of an M67-type star group	27
— and <i>J. G. Ireland</i> , Note on the magnetic structure of the Galaxy	35
<i>Ingham, M. F., D. E. Blackwell and</i> , Observations of the zodiacal light from a very high altitude station: I. The average zodiacal light	113
II. Electron densities in interplanetary space	129
III. The disturbed zodiacal light and corpuscular radiation	143
<i>Ingham, M. F.</i> , Observations of the zodiacal light from a very high altitude station: IV. The nature and distribution of the interplanetary dust	157

Instruments:

— First results of radio star observations using the method of aperture synthesis, <i>P. F. Scott, M. Ryle and M. Hewish</i>	95
— Photographic photometry with the Cambridge Schmidt telescope: I. Three-colour survey of the Praesepe region, <i>A. N. Argue</i>	197
— The possibility of observing features of galactic radio emission from a satellite-borne radio telescope, <i>F. G. Smith</i>	527
<i>Ireland, J. G., F. Hoyle and</i> , Note on the magnetic structure of the Galaxy	35
— On the effect of a helical magnetic field on the polarization of starlight	461
<i>Jarrett, A. H., and H. von Klüber</i> , Interferometric investigation of emission lines of the solar corona during the total solar eclipse of 1958 October 12,	223
<i>Jeffreys, Harold</i> , On two methods of Brown and Shook	335
— The effect of tidal friction on eccentricity and inclination	339
— Dissipative interaction between satellites	345
— On the figure of the Moon	421
<i>Kiang, T.</i> , The galaxian luminosity function	263
<i>Landseer-Jones, B. C.</i> , Viscous damping of hydromagnetic waves in the solar corona	89
<i>Leslie, P. R. R.</i> , The surface brightness of radio sources at galactic latitudes greater than 20°	51
— An investigation of the clustering of radio stars	371
<i>Long, R. J., and D. R. Marks</i> , The relation between the optical and radio magnitudes of galaxies	61
<i>Lytleton, R. A.</i> , An accretion hypothesis for the origin of the solar system	399
<i>McKenna, Susan M. P., M. A. Ellison, John H. Reid and</i> , Flares associated with the 1960 November event and the flare nimbus phenomenon	491
<i>McKinley, D. W. R., and E. L. R. Webb</i> , Reduction of meteor velocities from continuous-wave radio records	255
<i>McVittie, C. G., W. B. Bonnor and</i> , Hoyle's covariant formulation of the law of creation of matter	381
<i>Marks, D. R., R. J. Long and</i> , The relation between the optical and radio magnitudes of galaxies	61
<i>Mestel, L.</i> , A note on equatorial acceleration in a magnetic star	473

Meteors:

— Stony meteorite orbits, <i>J. A. Wood</i>	79
— Reduction of meteor velocities from continuous-wave radio records, <i>D. W. McKinley and E. L. R. Webb</i>	255

Moon:

— Thermal radiation from the Moon and the heat flow through the lunar surface, <i>J. E. Baldwin</i>	513
— On the figure of the Moon, <i>Harold Jeffreys</i>	421
<i>Morris, P. M.</i> , The Scorpio-Centaurus Association: II. Spectral types and luminosities of 220 O, B and A stars	325

Planetary theory:

— On two methods of Brown and Shook, <i>Harold Jeffreys</i>	335
<i>Pauliny-Toth, I. I. K., J. E. Baldwin and J. R. Shakeshaft</i> , Some attempts to detect linear polarization of galactic radio emission from the spur at $l^{\text{II}} = 30^\circ$	279
<i>Prasad, C., and H. S. Gurm.</i> , Radial pulsations of the polytrope $n=2$	409

Radio astronomy:

— The surface brightness of radio sources at galactic latitudes greater than 20° , <i>P. R. R. Leslie</i>	51
— The relation between the optical and radio magnitudes of galaxies, <i>R. F. Long and D. R. Marks</i>	61
— A comparison of three surveys of radio stars, <i>A. S. Bennett and F. G. Smith</i>	71
— First results of radio star observations using the method of aperture synthesis, <i>P. F. Scott, M. Ryle and M. Hewish</i>	95

Radio astronomy (contd.)	PAGE
— Some attempts to detect linear polarization of the spur of galactic radio emission at $l_{II} = 30^\circ$, <i>I. I. K. Pauliny-Toth, J. E. Baldwin and J. R. Shakeshaft</i> ...	279
— An examination of the steady-state model in the light of some recent observations of radio sources, <i>M. Ryle and R. W. Clarke</i> ...	349
— An investigation of the clustering of radio stars, <i>P. R. R. Leslie</i> ...	371
— The number-flux density relation for radio sources away from the galactic plane, <i>P. F. Scott and M. Ryle</i> ...	389
— The possibility of observing features of galactic radio emission from a satellite-borne radio telescope, <i>F. G. Smith</i> ...	527
— The radio emission from normal galaxies, II, <i>R. Hanbury Brown and C. Hazard</i> ...	479
